

# FE DEMISTER

## FILTER ELEMENTS FOR OIL MIST SEPARATORS

### DESCRIPTION

Replacement filter elements for fluidtech® oil mist separators (demister)

### APPLICATION

De-oiling of exhaust air from the crankshaft chamber of internal combustion engines or removal of oil mist when venting large oil tanks (e.g. bearing lubrication of turbo machines).

### MATERIALS

Filter media: fibrous special filter material, PES and glass fiber fleece  
Inner and outer support perforated stainless steel plate.

Cast-on end seals: Sealing is accomplished through the use of either a cast-on sealing bead with oil resistant 2K-silicone

### DESIGN

Flow from outside inwards (stability against collapse is achieved by filter-side inner supporting bodies).

### WORKING TEMPERATURE

From 0° to 120°C
